

PHMSA Hazardous Materials Registration Database

I have searched the registration database for companies that registered for the 2011-2012 and/or the 2012-2013 registration year and reported one of the following NAICS codes:

- 115112 Support Activities for Agriculture and Forestry: Soil Preparation, Planting, and Cultivating
- 325311 Chemical Manufacturing: Nitrogenous Fertilizer Manufacturing
- 325312 Chemical Manufacturing: Phosphatic Fertilizer Manufacturing
- 325314 Chemical Manufacturing: Fertilizer (Mixing Only) Manufacturing
- 424690 Merchant Wholesalers, Nondurable Goods: Other Chemical and Allied Products
Merchant Wholesalers (except Bulk Stations and Terminals)
- 424910 Merchant Wholesalers, Nondurable Goods: Farm Supplies Merchant
Wholesalers

These NAICS codes are those resulting from searching for “fertilizer” in the Bureau of the Census’ NAICS 2012 search engine (removing the codes for mining for fertilizer minerals, and for merchant wholesalers of fertilizer spreaders).

This produced a listing of 2,273 companies. Please note that companies with NAICS codes beginning with 1, or 4 do not necessarily deal in fertilizer, though they may.
